## “Simplified Software Solutions”

### BASE

We are a Mumbai based technology company whose key focus lies in being innovative by providing creative solutions to the most challenging IT problems while offering our services to those organizations desirous of customizing their operations or establishing their presence on the world wide web by using cutting-edge technology.

### Activity

Over the years, we have developed, designed and implemented software applications, web sites, etc. to cater to different industries like education, hospitality management, financial services, logistics and so on.

Our major activities revolve around:

- Product Development ➤ Security Services ➤ Client Server Solutions ➤ Web-based Development Activities ➤ Design & Maintenance of Websites (including domain name registration & hosting) ➤ Data Processing Solutions ➤ Consultancy ➤ Technical Support ➤ Legacy Systems Transformation

### Environment

Our current focus is on Client-Server Applications following Event-Driven and Object-Oriented Development Guidelines with Open Systems technology concepts.

The company applies the latest Microsoft Standards using VB.Net, VB6, VC++, XML, ActiveX Technology etc. and is equally accomplished employing SQL-92/ODBC compliant RDBMS.

With the trend gradually shifting towards using of open-source software, we are equally adept at such technologies like Java, JSP, J2EE, PHP, etc and databases like MYSQL.

### FLAGSHIP

Our core focus has been towards development of a customized Crew Management Database System titled - **“CrewsAlong”** a software ideally suited to organizations whose prime activity is sourcing and rotation of personnel for employment on board merchant navy ocean-going ships.

### OBJECTIVES

In order to attain client satisfaction, we need to carefully analyze our client's needs and expectations. To achieve this, we interact with our clients and endeavour to understand their requirements and thereby help them to attain their goal. We aim to achieve this by carrying out a thorough, in-depth study of their requirements. And, after elaborate discussions and meetings, we develop a tailor-made, customized solution just for you and make your dream a reality.

### TEAM

Two Project Managers, Two Project Leaders, programmers and a network of associates who collectively pool in their resources to provide cutting-edge solutions and who are driven by the sole objective of providing better performance.
